

Electronic Forms Made Easy.

Etrieve Forms Builder is an extension to the next generation, browser-based **Etrieve Forms** solution, allowing institutions to easily create, modify and deploy mobile-ready, dynamic HTML forms. Designed to work seamlessly with **Etrieve** components, **Forms Builder** allows users of all backgrounds to create customizable forms unique to their institution's needs.

The user-friendly interface allows users to build forms with no coding required. For those with the specific customization or advanced integration needs, **Forms Builder** also offers the option to build out form functionality through HTML code. The intuitive user interface not only expedites the building process, but also lightens the load for your institution's IT department.

Administrators and end-users can design and customize responsive electronic forms through a fully browser-based interface. Upon completion, the E-forms can be quickly deployed within **Etrieve Forms** and **Etrieve Flow**, and stored automatically to the correct student or employee record within **Etrieve Content**.

No Coding Required

User-friendly interface for building dynamic and responsive HTML forms

Make Edits Freely

Edit completed forms as needed and preview changes before publishing

Seamlessly Integrated

Quickly design, deploy, route and store electronic forms within Etrieve

Forms Templates

Simplified form creation through the use of field and form templates

Features and Benefits

- ▶ No coding knowledge required, making **Forms Builder** easy to use while also freeing up your institution's IT resources
- ▶ Create consistency in forms through the use of templates for common data sets like address, student information and signature rows
- ▶ Designer allows flexibility to make edits to completed forms, saving you both time and unnecessary effort
- ▶ Intuitive user interface and responsive design makes the process of building forms simple
- ▶ Preview forms as you build, reducing errors and ensuring accuracy of form creation
- ▶ Option to use provided templates for quicker customization, or build forms from the ground up
- ▶ Maintain branding consistency throughout various forms with the ColorSaver feature
